

IMPORTANT INFORMATION REGARDING GRAVEL

Gravels are natural stone that has been quarried from all over.

As a natural product they are prone to variations in color, size, and shape. We have no control over the consistency of the product. No two loads of gravel will be identical, as the same gravel is frequently quarried from different veins of the same quarry or from different quarries, depending on availability.

Our sample bins are only a small representation of the product. Please stop by our yard and look at the gravel in their bins. If you see something that you really like, we suggest that you have the delivery made immediately as there is no guarantee that the material will match or be the same the next time you order.
