Holds approximately 10-12 yards of a lightweight product like mulch.
Holds approximately 5-10 yards of a heavy product like sand, gravel, or soil.

Truck Height 12 Feet, Dumping Height 21 Feet, Truck Width 11.5 Feet

DELIVERY RESTRICTIONS

Please review the following delivery restrictions to ensure we can drop off your product at your work site. If your delivery site has any of these restrictions, please contact us ahead of time so we can figure out the best solution.

- Overhead wires & tree branches
- Narrow gates and fences
- Off-roading/heaving pavement
- Rough/uneven terrain
- New concrete
- Space limitations for trucks to dump
- Basketball hoop or alike object

The products that we haul are extremely heavy, therefore, our trucks tend to be the heaviest-duty on the road. Different products have different weights, so the truck capacities will change from product-to-product and load-to-load.

We will always do our best to send a delivery truck that matches the size of the order with the size of the delivery site, however, due to legal weight restrictions and on-site space constraints, it may be necessary to schedule multiple deliveries to fulfill orders.
