

WHAT IS A YARD?

All measurements are approximate.
Photos and visual aids are intended for estimation purposes only

A yard is about 4 ½ contractor size (6 cubic foot) wheelbarrows

Or 13 ½ standard size (2 cubic foot) bags of mulch

Or 54 standard bags (.5 cubic foot) of sand, stone or soil

Or one full bucket of our loader (27 cubic feet)

When spread, a yard covers approximately a 10 x 15 (150 Sq. Ft.) area
at 2 inches deep

WHAT TO EXPECT WHEN IT'S DELIVERED

One Yard Pile

5 Yard Pile

10 Yard Pile

This is an approximation. Pile size and shape will vary depending on product, delivery truck and driver.

4 REASONS WHY YOU CAN TRUST OUR QUANTITIES

1. Process

Our well-trained staff ensures that customers receive the correct amount they ordered. Every delivery that leaves our yard gets processed by our dispatcher, the delivery driver and the loader operator. All buckets are certified buckets that were manufactured to hold specific quantities of 1 yard or ½ yard for loading simplicity.

2. Standards

Our scales are inspected yearly by the county weights and measures, and our loader buckets meet manufacturer specifications when they are built. You can be confident that our material measurements are accurate.

3. Transparency

Our store is open to the public, so customers are always invited into our yard to witness their delivery being loaded or pick up material during our working hours.

4. Reputation

We have spent over 40 years delivering many cubic yards of material to thousands of satisfied customers. Our loyal and knowledgeable staff has a combined 150+years of experience in this industry. We are not a fly-by-night company, we do not cut corners, and we do not compromise service and quality for a quick sale.

Order from a reputable company!

Order from Mr. Yard!
